SUMMARY

Full Stack Developer with hands-on experience in JavaScript, React, Redux and Python, with deep knowledge of web application development and high-quality code creation. Skilled in building responsive and dynamic web applications with clean, maintainable code. Proven ability to solve technical challenges and optimizing performance using modern technologies. Strong analytical mindset and committed to continuous learning and innovation.

TECHNICAL SKILLS

JavaScript, React, Redux/Toolkit, TypeScript, Babel, Node.js, Python, PostgreSQL, HTML, CSS, jQuery, AJAX, Tailwind, DaisyUI.

TECHNICAL PROJECTS

- Refactored the code to meet European standards
- Rewrote more than 50 components, removed code duplication, unified, made them reusable with cross-browser compatibility and added them to the documentation.
- Refactored legacy jQuery and AJAX code into modern React with asynchronous fetch logic for better maintainability.
- Developed a forms for validating new users.
- Developed full-stack Dating app with Node.js+Express server and React+Redux/Toolkit frontend. Implemented such features as: Socket.io messages, GWT, Cloudinary, web-push, with a database on PostgreSQL.
- Contributed to the development Game Website (Russia-based, community platform): developed a dynamic player statistics dashboard using JavaScript and REST APIs, improved the rating system's algorithm to provide more accurate player rankings, designed the website elements. Project is live: https://gomafia.pro/.
- Developed my own website using React and Tailwind.
